**INVESTMENT OBJECTIVE AND STRATEGY**

Intends to achieve for its participants long-term capital growth via investments primarily in Philippine equities listed in the Philippine Stock Exchange (up to 90% of the portfolio). The Fund aims to surpass its benchmark (gross of fees) which is the Philippine Stock Exchange Index (PSEi).

**CLIENT SUITABILITY**

- A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.
- The AB CAPITAL EQUITY FUND is suitable for individual and corporate investors who are at least classified as aggressive based on their risk profile and who seek potentially higher returns through stock market investments but are also aware of the possibility of capital losses that such investments may entail.
- In order to minimize risks and maximize returns, the participants are recommended to stay invested in the Fund for more than three (3) years.

**KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

<b>Interest Rate Risk</b>	Possibility for an investor to experience losses due to the changes in interest rate. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
<b>Market/Price Risk</b>	This is the possibility for an investor to experience losses due to the changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations. It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuate over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the Net Asset Value per Unit (NAVPU) may increase to make profit or decrease to incur loss.
<b>Liquidity Risk</b>	This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market. Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until assets can be converted to cash.
<b>Credit/Default Risk</b>	Possibility for an investor to experience losses due to borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. Inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities. This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counterparty, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITF's NAVPU will be affected by a decline in value.

**\* THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).**  
**\* RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.**

WEALTH BANK PESO TD (WEALTH) - Php 205,381.54

Investments in the said outlets were approved by the Trust Committee. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

## OUTLOOK AND STRATEGY

### Stock Market

The Philippine Stock Exchange Index (PSEi) ended the first half of 2020 at 6,207.72, representing a 20.6% year to date decline. Quarter on quarter, however, the market showed some signs of strength, rising by 16.7% from end-March levels. Global stock market rallies helped fuel optimism for the local bourse as well as the easing of restrictions when President Duterte placed the National Capital Region under General Community Quarantine effective June 1. As the economy continues to grapple with the effects of the quarantine, the Development Budget Coordination Committee (DBCC) also updated its 2020 GDP forecast for the Philippines with a range of -3.4 to -2.0%. Foreign investors remained net sellers, bringing YTD net outflows to P68.44 billion as of end-June, a stark contrast from the P21.26 billion net inflows in the same period last year. Foreign investor participation stood at 51% of total market value. The Philippine Peso strengthened against the US Dollar by 1.59% in the first half, closing at a three-year high level of P49.83 on the back of a generally weak US Dollar, narrowing trade deficit and strong macro fundamentals.

### AB Capital Equity Fund Performance

The AB Capital Equity Fund posted a return of -24.62% for the first half of 2020. The Net Asset Value Per Unit (NAVPU) decreased to 2.4283 in June 2020 from 3.2215 in December 2019.

### Fund Strategy

We still expect volatility ahead as investors continue to assess the economic impact of COVID-19. The 2Q 2020 earnings reporting season will provide more details on the hit to corporate earnings but may also reveal some bright spots on the road to recovery. The continuing rise in COVID-19 cases will likely keep investors more circumspect, which may potentially lead to a range bound market in the short term. However, positive news on the much-awaited additional stimulus measures and progress on vaccine development may also inspire confidence back into the market. The economic recovery will be uneven and it is important to focus on sectors and companies that are resilient and likely to bounce back first. It would still be prudent to have some cash available to prepare for volatility while keeping in mind that opportunities may arise when valuations become more compelling.

## LIST OF PROSPECTIVE INVESTMENTS

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in:

- a) Listed and soon to be listed (Initial Public Offering) common stocks, preferred stocks, and securities convertible into or exchangeable to common stocks;
- b) Fixed-income securities issued by the government and corporations such as but not limited to, commercial papers, promissory notes, bonds, non-convertible preferred shares exchange-traded fixed income securities, collective investment plans of the trustee/other trustees and other marketable securities that are traded in an organized exchange market;
- c) Other investments allowed under regulations issued by the BSP.

The combined exposure of the Fund to any entity and its related parties shall not exceed fifteen percent (15%) of the market value of the Fund. Provided, that Fund investments, partially or substantially, in exchange traded equity securities shall be subject to the fifteen percent (15%) exposure limit.
